ANSWER: B

A dynamic envelope is the marked safety zone at railroad crossings that must be kept clear for trains to pass safely. The area is outlined with white connecting X's to alert drivers, bicyclists, and pedestrians not to stop within it. Any object inside this zone could be struck by a passing train.

Dynamic envelopes serve to:

- Encourage safer driver behavior.
- Prevent vehicles from stopping too close to or on the tracks.
- Reduce injuries and fatalities at rail crossings.

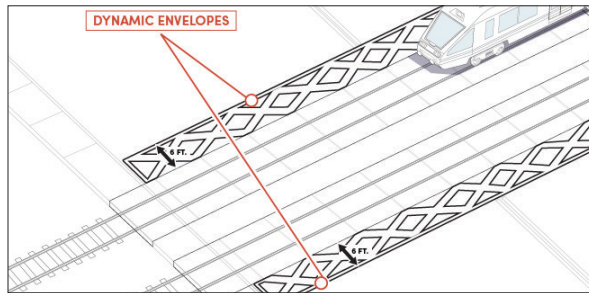

ANSWER: B

A dynamic envelope is the marked safety zone at railroad crossings that must be kept clear for trains to pass safely. The area is outlined with white connecting X's to alert drivers, bicyclists, and pedestrians not to stop within it. Any object inside this zone could be struck by a passing train.

Dynamic envelopes serve to:

- Encourage safer driver behavior.
- Prevent vehicles from stopping too close to or on the tracks.
- Reduce injuries and fatalities at rail crossings.
